Please contact Sarah-Jane Cox at Castletown Stud on 07780 957617

We also have other pure bred Trakehner youngstock available – please do not hesitate to ring us and discuss

An outstanding Trocadero Colt Filmstar has three amazing paces and the best canter we have seen in a young Trakehner! He has superb Trakehner type, good conformation and an excellent character.

His father Trocadero was Reserve Champion of the 1996 Stallion Grading in Neumünster, and achieved a price of 280,000 DM in the 1998 Klosterhof Medingen Auction.

Trocadero completed an outstanding performance test in Warendorf with a total of 125.89 points (overall 3rd place), and was champion of the dressage marks with 142.76 points, including a 10 for character.

Trocadero is a grey large framed stylish stallion with wonderful type and outstanding conformation. His exceptional temperament and powerful elastic movement ensure that he greatly enriches the reputation of Trakehners.

Although, due to his dressage career, Trocadero has not been used widely as a sire in Germany, already two of his daughters have achieved premium status. His foals impress with their excellent paces and superb Trakehner type.

His grandfather, Latimer, is one of the most popular Trakehner stallions in Germany, both in this own breed as well as in Honover and Oldenburg, where he also has approved sons. His offspring are well known for their outstanding temperament, excellent walks and uphill canters. They also jump very well too. Latimer was the German National Champion 4 year old stallion in 2000 due to his near perfect conformation, superb paces and unsurpassed rideability for which he received 9.5 and 10 from the guest riders! He also was Champion on his Performance Test with 152 points and 9.67 for rideability, 9.5 for walk and 8.84 for trot and canter.

Filmstar's mother, Flora, was graded with 53 points in 2005 and will receive the Premium title once she successfully completes a Mare Performance Test. Flora's sister, Fablixa, received Premium marks of 54 at her grading in 2006.
